As the chandeliers not yet are UL labelled they will not be delivered wired.
Though this is prepared for and is easily mounted by an authorised electrician.
Please see further information.

- Glasses are not included.

The Glass Cluster/Glasklasen - the US version

Glasklasen/The Glass Cluster is a chandelier and at the same time storage for drinking-glasses with stems. Naturally the glasses are meant to be taken out for use and then replaced when being cleaned.

The Glass Cluster is to be used with either all glasses alike or with various combinations and colours, it's just a matter of taste. The chandelier is adapted to fit over a dining table, a bar or in a window-recess, in public environments as well as in private homes.

With a clear bulb, e.g. a carbon-filament lamp, The Glass Cluster will provide a pleasant lighting where reflections from the glasses creates lights and patterns on surrounding surfaces in the room.

The Glass Cluster is a genuine product of Swedish art industry, designed by a team of two architects, Gunnar Cedervall and Björn Stillefors, and an industrial designer, Jörgen Pudeck. The manufacturing takes place in Sweden at a smithy dating from 1840.

OUR RANGE:

All chandeliers are made of steel and The Glass Cluster/Glasklasen 40 glasses and The Small Cluster/Lillklasen 16 glasses are kept in stock in three different finishes: black lacquer, clear lacquer or chromium-plating. These chandeliers has a total height of 80 cm/31.5 in and are adapted to fit above a dining table in a room with a height of 2.40 m/95 in. The height will be possible to adjust as ten S-shaped hooks are enclosed. Each hook is 10 cm/3.9 in long and are of the same finish as the chandelier of your choice.

There is also a version of the 16-glass model named The Light Cluster/Ljusklasen, also kept in stock. This chandelier has a holder for a tea light candle in the center and is therefor not made for electric fittings and comes only black lacquered. It has the same glass-holder as the Small Cluster 16 glasses size but has a short rod with a chain extension.

Lastly there is also a 76-glass version, The Big Cluster/Storklasen, which comes only in the black lacquered finish and with two rods. This chandelier is always made to order and the length of the rods is customised.

ELECTRIC FITTINGS:

Wire and bulb socket is not enclosed with this US version as the chandeliers not are UL approved.

Though the chandeliers are prepared for wiring. The rods comes with threading and washer mounted on its lower end and the electric fittings are therefor easily assembled by an electrician.

ORDER:

First order is to be paid in advance. Second time order and onwards has a due date of 30 days.

After placing an order we will send you an invoice in Swedish currency, SEK. The sum is to be wired to our bank account through your bank. Please notice invoice number on the payment order, unless sender of payment could be difficult to identify.

Credit cards or checks can not be accepted.

Reclamations and refunds only after agreement with us.

LEAD TIME:

We keep the 40 and 16 glass models in stock in the three different finishes and send them out of Sweden within 8 days from order date. The Big Cluster/Storklasen of 76 glasses, which is only made to order, has generally a lead time of six weeks depending on the current work load.

- Please see sketches for technical information and measurements.
- Please notice that glasses are not included.
- Photos are available at our web-site. High solution photos can be provided.
